

EDIFICIO ALHAMBRA

Madrid, Spain

Its waning moon shape welcomes a landscaped space in its bosom, with native vegetation, which seems to extend outside as far as the eye can see. As a transition between this natural garden-square and the building, with its hard facade of glass and anodized aluminum and anodized aluminum facade, a double slope with bushes and double slope with bushes and low plants.

ARCHITECT: Arnaiz Arquitectos

CLIENT: Terralia Construcciones

TYOLOGY: Passive CW S70

SURFACE: 6.200 m²

"In reality, it is composed of two curved wings that do not share the same longitudinal axis. The encounter between them configures the entrance. It is the area of greatest spatial richness".

Leopoldo Arnáiz Eguren
